

**JOB OPPORTUNITY – Senior Mining Engineer**  
**VALENTIS – INTERNATIONAL MINING SERVICES COMPANY**

**ABOUT VALENTIS**

- Valentis Group is Australian company and leading mineral exploration services provider in Myanmar.
- Valentis works with a range of local and foreign clients looking to invest in Myanmar's mineral sector. Valentis prides itself on its ability to manage projects for clients on a turnkey basis.
- Our services includes; Exploration, Geology, Drilling, Sample Preparation, Environmental, Government Relations and Commercial Advisory.
- Valentis is looking for an experienced **Senior Mining Engineer** with international experience to join the Mining Division. This is a **contract role based in Yangon**, with the possibility of transition to a permanent position.

**Key Benefits**

- A competitive remuneration package will be negotiated with the successful candidate

**Key Responsibilities (Essential Duties and Functions)**

- Detailed reviews of client mining operations with reporting and recommendations on:
  - Mine Planning and Construction – assessment of mine construction operations, including open pit and underground designs, location and development of ramps and access roads, layout of infrastructure and services, and planning improvements
  - Mine Optimisation and Mining Methods – Evaluating models to optimize mining, evaluating factors such as mining method, mining risks, haulage capacity, safety, operational parameters and costs, deposit parameters and characteristics, and overburden depth.
  - Economic Evaluations: Evaluation of budgets, mining and mill throughput costs, analysis of cycle time opportunities in the load/haul fleet, analysis of operational costs for annual budget preparation and reporting
  - Capital Forecasts: evaluation of long term capital equipment needs and life of mine scheduling of equipment, labour and infrastructure
- Technical input into scoping, pre-feasibility and feasibility studies for the economic assessment of new projects
- Supervision of construction and operations on client projects.
- Collaboration with internal and client teams (exploration, geotechnical, environmental, financial) on project reviews

**Requirements**

- Bachelors and/or Associate Degree in Mining Engineering
- Membership of a Professional Engineering Organization
- Display a professional and courteous attitude to clients, co-workers, supervisors, and the general public at all times.
- Must be willing to travel within Myanmar and work away from Yangon for extended periods when required. Some international travel may also be required
- Strict adherence to safety requirements and procedures
- Willingness to work in a team environment and assist co-workers or supervisors with other duties as required.
