

JOB OPPORTUNITY – GEOTECHNICAL MANAGER VALENTIS – INTERNATIONAL MINING SERVICES COMPANY

ABOUT VALENTIS

Valentis Group is Australian company and leading services provider in the construction, infrastructure, mining and power sectors in Myanmar. Valentis works with a range of local and foreign clients in Myanmar. Our key divisions include:

- **Valentis Services** – Valentis Services offers exploration and mining services including exploration program design, program execution, field management, data interpretation and GIS services, drawing on the skill, experience and local knowledge of our combined Australian and Myanmar geological team.
- **Valentis Environmental and Geotechnical Services** – VEGS provides geotechnical engineering and practical environmental management and solutions for the construction, infrastructure, mining and power sectors in Myanmar.
- **Titeline Valentis Drilling Myanmar** – TVDM is a joint venture between Australian company, Titeline Drilling International (from Melbourne, Australia) and Valentis. TVDM provides exploration drilling and geotechnical drilling services in Myanmar.
- **Valentis Austhai** – Valentis Austhai is a joint venture between Valentis and Austhai Geophysics Consultants (from Bangkok, Thailand) that offers a broad range of specialist geophysical survey services in Myanmar. Valentis Austhai has equipment and trained personnel located in Myanmar and Thailand.

Valentis is seeking a **Geotechnical Manager** to join our growing team.

Key Benefits

- Working with an international team, with diverse project experience across Myanmar
- Career development opportunities, including attendance at the Valentis developed training programs

Key Responsibilities (Essential Duties and Functions)

The desired civil design skills include: excavation support design, ground improvement design, instrumentation design and interpretation, technical specification development, and geotechnical drilling management. Other responsibilities include performing or preparing:

- Geotechnical field investigations.
- Geotechnical in-site testing.
- Coordination of lab tests.
- Environmental site characterizations.
- Technical memos and reports.
- Field program management e.g. drilling.

Requirements

- BS in Civil Engineering, or similar, is required
- MS in Geotechnical or Structural Engineering is preferred
- 10+ years of experience is preferred

- Experience with geotechnical engineering design –specifically, an excellent formation in soil mechanics, geotechnical engineering, and structural engineering concepts
- Experience in excavation support design and earth retaining systems
- Excellent writing and general communication skills
- CAD skills and drawing ability; GIS and modeling experience is a plus
- Ability to travel for meetings and short-term field assignments
- High proficiency in both written & spoken English
