

## JOB OPPORTUNITY – GIS Staff

### VALENTIS – INTERNATIONAL MINING SERVICES COMPANY

#### ABOUT VALENTIS

Valentis Group is Australian company and leading mineral exploration services provider in Myanmar. Valentis works with a range of local and foreign clients looking to invest in Myanmar's mineral sector. Our key divisions include:

- **Valentis Services** – Valentis Services offers exploration and mining services including exploration program design, program execution, field management, data interpretation and GIS services, drawing on the skill, experience and local knowledge of our combined Australian and Myanmar geological team.
- **Titeline Valentis Drilling Myanmar** – TVDM is a joint venture between Australian company, Titeline Drilling International (from Melbourne, Australia) and Valentis. TVDM provides exploration drilling services in Myanmar and combines a world class exploration drilling service provider with Valentis' in depth market knowledge and expertise in mining services.
- **Valentis Austhai** – Valentis Austhai is a joint venture between Valentis and Austhai Geophysics Consultants (from Bangkok, Thailand) that offers a broad range of specialist geophysical survey services in Myanmar. Valentis Austhai has equipment and trained personnel located in Myanmar and Thailand.
- **Valentis Environmental and Geotechnical Services** – VEGS provides geotechnical engineering and practical environmental management and solutions for all phases of mining and civil projects, from pre-feasibility to design, construction, operation and closure phases.

Valentis is growing substantially and we look forward to you joining the team at this exciting time.

#### Key Responsibilities (Essential Duties and Functions)

Reporting to the GIS Manager and the CEO of Valentis Services, the role responsibilities include –

- Assisting in data capture and spatial database creation within the Valentis GIS department.
- Provide geospatial technical support to the field teams and the Business Development Division.
- Ensure all field data is regularly and consistently collected from field teams and configured for the database.
- Ensure the security and integrity of the database is maintained, backed up with an external failsafe system.
- Training of other technical divisions and personnel to develop best practice in data management and Geospatial Technology.
- Maintain proper documentation of the database systems and procedures to ensure system sustainability and efficient disaster recovery.
- Assist in the further development and improvement of the Valentis GIS and RS databases.
- Participate in the planning of field programs as required including the construction of data collection.

- Participate in tender applications requiring provision of GIS services.

### Key Benefits

- Working with an international mining services team with diverse project experience across Myanmar.
- Career development opportunities, including attendance at the Valentis Management School and other internal and external training.
- Competitive salary with performance review-based bonuses, and opportunities for career promotion.

### Requirements

- Bachelor Degree in Geology, Geography or other related Geospatial Technology Stream (Geology, Geography, Forestry Preferred).
- Post-graduate Diploma in GIS/RS.
- At least three years demonstrated GIS and digital mapping experience.
- Experience in Spatial Database Management.
- Knowledge in geochemical and geophysical data management.
- Knowledge of technical and commercial data relevant to the mining industry.
- Broad knowledge of the various technical disciplines of the mining industry – Geology, Engineering, Metallurgy, Geotechnical and Environmental.
